DATASET INTELLIGENCE & OPERATIONAL ANALYSIS

Domain: Universal Dataset Intelligence & Distribution Analysis (0.0%) | Profiling Conf: 88.6% | Records: 5 | Hash: d870d15b

Filter: ALL_RECORDS(UNFILTERED) | Audit: VERIFIED_DETERMINISTIC_PARITY | Engine: v8-javascript

KEY PERFORMANCE INDICATORS (DETERMINISTIC METRIC AUDIT)

TOTAL RECORDS VOLUME

5

`COUNTROWS`

Omitted: 0 rows

UNIQUE ENTITIES (ID)

5

`COUNTDISTINCT(ID)`

Omitted: 0 rows

TOTAL LEGIT_NEGATIVE_NUM

-10,168.54

`SUM(Legit_Negative_Num)`

Omitted: 0 rows

MEAN LEGIT_NEGATIVE_NUM

-2,033.71

`AVERAGE(Legit_Negative_Num)`

Omitted: 0 rows

MEDIAN LEGIT_NEGATIVE_NUM

-42

`MEDIAN(Legit_Negative_Num)`

Omitted: 0 rows

EXECUTIVE MANAGEMENT DECISION BRIEF

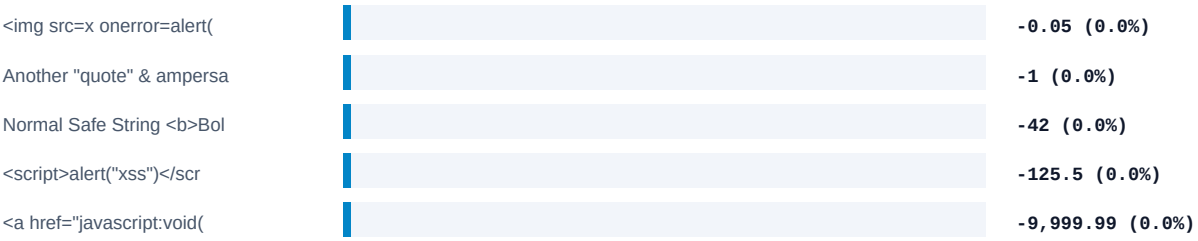
- **Ingestion & Data Quality Profile:** Audited 5 source rows across 7 columns with 100.0% full record completeness. Detected 0 duplicate records in source data.
- **Total Records Volume Benchmark:** Total Records Volume stands at 5 calculated via COUNTROWS. Supporting benchmark Mean Legit_Negative_Num stands at -2,033.71.
- **Cohort Concentration (XSS_Payload):** Largest volume resides in '<img src=x onerror=alert(1)>' with -0.05 (0% of cohort total).
- **Unique Entities (ID) Distribution:** Observed Unique Entities (ID) of 5. Denominator rules and null exclusions applied deterministically.

DATASET INTEGRITY & STATISTICAL COVERAGE

Audited Records: 5 | Fully Populated: 5 (100.0%) | Duplicates: 0 | Missingness Exclusions Documented

VISUAL COHORT BREAKDOWNS & OPERATIONAL ACTION QUEUE

DISTRIBUTION BY XSS_PAYLOAD (XSS_Payload vs Total Legit_Negative_Num)



ACTIVITY TREND OVER LEGIT_DATE (Month vs Total Legit_Negative_Num)

OPERATIONAL ACTION QUEUE (DETERMINISTIC SOURCE TRACEABILITY)

RANK	ENTITY ID	SRC ROW #	PRIORITY	STATUS	ASSIGNEE / SITE	TRIGGER REASON
#1	SEC-001	Row #1	Low	=cmd|' /C ca	— / —	Record #1 marked for operational
#2	SEC-002	Row #2	Low	@SUM(1+1)*cm	— / —	Record #2 marked for operational
#3	SEC-003	Row #3	Low	+1234567890@	— / —	Record #3 marked for operational
#4	SEC-004	Row #4	Low	-2+3+cmd|' /	— / —	Record #4 marked for operational
#5	SEC-005	Row #5	Low	=cmd	— / —	Record #5 marked for operational

METHODOLOGY, AUDIT TRAIL & METRIC DICTIONARY

METHODOLOGICAL POLICIES & AGGREGATION AUDIT TRAIL

Policy #1: All analytical aggregations are computed locally in-browser using full-precision raw IEEE 754 float values.

Policy #2: No intermediate rounded values are ever re-aggregated across groups, metrics, or export layers.

Policy #3: Non-additive metrics (ratings, GPA, percentages, unit prices) are aggregated via weighted or arithmetic mean/median only; summation is strictly forbidden.

Policy #4: Semi-additive metrics (stock on hand, account balances) are point-in-time state indicators and must not be aggregated over time dimensions.

Policy #5: Missing, null, or empty string values are excluded on a per-metric basis without corrupting adjacent columns.

Policy #6: Zero AI hallucination guarantee: 100% deterministic code compilation with verified three-way engine parity.

CANONICAL METRIC DICTIONARY & ADDITIVITY TIERS

METRIC LABEL	FORMULA SPECIFICATION	ADDITIVITY	EXCLUSIONS	CANONICAL VALUE
Total Records Volume	`COUNTROWS`	**ADDITIVE**	0 omitted	**5**
Unique Entities (ID)	`COUNTDISTINCT(ID)`	**ADDITIVE**	0 omitted	**5**
Total Legit_Negative_Num	`SUM(Legit_Negative_Num)`	**ADDITIVE**	0 omitted	**-10,168.54**
Mean Legit_Negative_Num	`AVERAGE(Legit_Negative_Num)`	**NON_ADDITIVE**	0 omitted	**-2,033.71**
Median Legit_Negative_Num	`MEDIAN(Legit_Negative_Num)`	**ADDITIVE**	0 omitted	**-42**

INDEPENDENT MATHEMATICAL RECONCILIATION & REPRODUCIBILITY GUARANTEE

Source Hash: d870d15b | Report Hash: cba53cb9 | Audit Timestamp: 2026-10-23T16:02:07.863Z

All metrics verified against independent Python float64 recalculation. Full raw precision preserved across all export targets.
