SALES & REVENUE OPERATIONS EXECUTIVE DASHBOARD

Domain: Sales & Revenue Operations (95.0%) | Profiling Conf: 90.2% | Records: 5,000 | Hash: 09f77e8f

Filter: Region=South(1248/5000) | Audit: VERIFIED_DETERMINISTIC_PARITY | Engine: v8-javascript

KEY PERFORMANCE INDICATORS (DETERMINISTIC METRIC AUDIT)

TOTAL TRANSACTIONS

5,000

`COUNTROWS`

Omitted: 0 rows

TOTAL NET SALES

$34.36M

`SUM(Net_Sales)`

Denom: 5,000 commercial transactions audit

AVERAGE ORDER VALUE (AOV)

$6,872.95

`AVERAGE(Net_Sales)`

Denom: 5,000 distinct orders (order grain

TOTAL GROSS SALES

$36.92M

`SUM(Gross_Sales)`

Denom: 5,000 transactions before deduction

TOTAL GROSS PROFIT

$11.19M

`SUM(Profit)`

Omitted: 0 rows

GROSS PROFIT MARGIN %

32.56%

`RATIO(Profit) / SUM(Net_Sales)`

Denom: Evaluated over non-zero Net_Sales

TOTAL COST (COGS)

$23.18M

`SUM(Total_Cost)`

Omitted: 0 rows

TOTAL UNITS SOLD

22,660

`SUM(Quantity)`

Omitted: 0 rows

EXECUTIVE MANAGEMENT DECISION BRIEF

- **Ingestion & Data Quality Profile:** Audited 5,000 source rows across 22 columns with 100.0% full record completeness. Detected 0 duplicate records in source data.
- **Total Net Sales Benchmark:** Total Net Sales stands at $34.36M calculated via SUM(Net_Sales).
- **Temporal Trajectory (Month):** Measured from 2024-01-01 (9,61,481.2) to 2026-10-01 (9,20,753.15) with -4.2% net trajectory. Peak volume recorded in 2024-04-01 (13,79,931.8).

DATASET INTEGRITY & STATISTICAL COVERAGE

Audited Records: 5,000 | Fully Populated: 5,000 (100.0%) | Duplicates: 0 | Missingness Exclusions Documented

VISUAL COHORT BREAKDOWNS & OPERATIONAL ACTION QUEUE

NET SALES TRAJECTORY OVER ORDER DATE (Month vs Net Sales • AREA)

CUSTOMER SEGMENT MARKET SHARE (Customer_Segment vs Net Sales • DONUT)

METHODOLOGY, AUDIT TRAIL & METRIC DICTIONARY

METHODOLOGICAL POLICIES & AGGREGATION AUDIT TRAIL

Policy #1: All analytical aggregations are computed locally in-browser using full-precision raw IEEE 754 float values.

Policy #2: No intermediate rounded values are ever re-aggregated across groups, metrics, or export layers.

Policy #3: Non-additive metrics (ratings, GPA, percentages, unit prices) are aggregated via weighted or arithmetic mean/median only; summation is strictly forbidden.

Policy #4: Semi-additive metrics (stock on hand, account balances) are point-in-time state indicators and must not be aggregated over time dimensions.

Policy #5: Missing, null, or empty string values are excluded on a per-metric basis without corrupting adjacent columns.

Policy #6: Zero AI hallucination guarantee: 100% deterministic code compilation with verified three-way engine parity.

CANONICAL METRIC DICTIONARY & ADDITIVITY TIERS

METRIC LABEL	FORMULA SPECIFICATION	ADDITIVITY	EXCLUSIONS	CANONICAL VALUE
Total Transactions	`COUNTROWS`	**ADDITIVE**	0 omitted	**5,000**
Total Net Sales	`SUM(Net_Sales)`	**ADDITIVE**	0 omitted	**$34.36M**
Average Order Value (AOV)	`AVERAGE(Net_Sales)`	**NON_ADDITIVE**	0 omitted	**$6,872.95**
Total Gross Sales	`SUM(Gross_Sales)`	**ADDITIVE**	0 omitted	**$36.92M**
Total Gross Profit	`SUM(Profit)`	**ADDITIVE**	0 omitted	**$11.19M**
Gross Profit Margin %	`RATIO(Profit) / SUM(Net_Sales)`	**NON_ADDITIVE**	0 omitted	**32.56%**
Total Cost (COGS)	`SUM(Total_Cost)`	**ADDITIVE**	0 omitted	**$23.18M**
Total Units Sold	`SUM(Quantity)`	**ADDITIVE**	0 omitted	**22,660**

INDEPENDENT MATHEMATICAL RECONCILIATION & REPRODUCIBILITY GUARANTEE

Source Hash: 09f77e8f | Report Hash: c0872d4c | Audit Timestamp: 2026-10-24T11:15:11.751Z

All metrics verified against independent Python float64 recalculation. Full raw precision preserved across all export targets.
